

## **East Asia Summary of Audit Responses for IMC May 2020**

Returns have been received from CILT Hong Kong, China and Macao. I have suggested James, CILT Taiwan to use the questionnaire format for reply, but not sure whether he will complete it in time.

Anyhow, summarizing the returns, I may conclude the followings:

1. CILT East Asia branches have been actively communicating with their members through e-bulletin, e-mail, video conferencing and other social media including WeChat, Whatsapp, Facebook, etc.
2. CILT branches have been active in working together with the governments and the industry regarding the anti-epidemic measures and relief measures.
3. The CILT International Webinars and Bulletins are important and useful, and instrumental in enhancing CILT's visibility and functions in the industry and public in general. These efforts should continue.
4. Block down measures are beginning to be relax, we believe CILT should:
  - a. Suggest general principles and simple guidelines to cope with the relaxation;
  - b. Suggest approach and details of a global approach to cope with the situation;
  - c. Suggest approach to resolve issues that might come up e.g. anticipated surge in air fares, proper capacity planning, capacity and equipment shortage in case of cargo rebound, liquidity issues and bankruptcies, etc. We understand that CILT branches will provide inputs to their respective administrations, but general recommendations from CILT could be useful. It might enhance CILT's status as an international professional institution.
5. It is insightful for CILT to plan for conducting studies and researches. With a global presence, besides local studies, CILT should be well situated to contact cross-nation and cross-economy studies and researches. CILT International could well perform a co-ordinating role.

Regards,  
Sunny
