# SCPD Modules

SCPD E-learning Modules are adopted by educational institutions in Singapore and the region, Government training academies and global logistics corporations

To enrol, please click on the preferred module below:

## Professional Certificate Modules

## Advanced Professional Certificate Modules

The development of skills and capabilities in logistics and supply chain management is key to Singapore strengthening its position as a logistics hub. **Recognising that the SCPD programme was a pioneering initiative in offering comprehensive training on an innovative e-learning platform, we were happy to support its development.**

Mr Poon Hong Yuen  
Deputy Director

Manufacturing & Services  
Infocomm Development Authority of Singapore

The SCPD programme provides a pathway for logistics professionals to deepen their knowledge and skills in a learning environment that challenges and engages their minds through the use of multimedia, animation, graphics and classroom interaction with subject matter experts. Continual knowledge and capability building will be a prerequisite for Singapore-based logistics companies to expand their operations into the region and beyond.

Mr Lim Meng Hui  
Assistant Director

Transport & Logistics Division  
International Enterprise Singapore

## FAQs

### **How important is the logistics and transport industry to Singapore's economy?**

The industry contributes about 7% of Singapore's gross domestic product and employs 9% of its total workforce.

### **How does the SCPD Programme benefit me?**

The self-paced programme provides a flexible, convenient and cost-effective way for logistics professionals to upgrade their skills and knowledge, and mid-career professionals and managers to move to a more dynamic and resilient industry.

### **How does SCPD offer me a complete training roadmap to build my career?**

The SCPD Programme comprises 2 levels - **Professional Certificate (SCPD01-04)** and **Advanced Professional Certificate (SCPD05-08)**. The modules can be taken in any order. Learners who successfully complete the 4 modules and pass the exams will be awarded the respective certificate. While it is possible to take the Advanced Professional Certificate modules (SCPD05-08) first, learners without requisite experience should take the Professional Certificate modules (SCPD01-04) before proceeding to the advanced modules to ensure proper grounding for building up their careers.

The syllabus of the Advanced Professional Certificate also prepares candidates with the requisite experience and qualifications to sit for the industry's highest professional certification examination, the **Certified Professional Logistician (CPL)**, which is exclusively awarded by CILT Singapore.

The full progression path of the SCPD Programme leading to the CPL Certification is as shown:

**CPL, Advanced Professional Certificate & Professional Certificate are recognised qualifications for membership grades in CILT.**

## Micro Learning Courses

*Specially brought to you jointly by*

The Chartered  
Institute of Logistics  
and Transport

 **Temasek**  
POLYTECHNIC

*Micro-Learning Courses (MLCs) are short online courses that run on your mobile devices so that you can learn anytime, anywhere.*

*To enrol, please click on the preferred MLC below:*

Course fee: **\$60** per MLC

*Singapore Citizens aged 25 and above can purchase the MLCs using their **SkillsFuture Credit***

### FAQs

#### What are MLCs?

MLCs are short, bite-sized and activity-based courses delivered via a mobile app. They are suitable for those with no basic knowledge but are considering to move into the field. Each MLC consists of 10 to 20 lessons with each lesson having a duration of about 15 mins. The MLCs can be taken in any order.

**For learners desiring to prepare fully for a career in logistics and supply chain management, it is advisable that they attempt the SCPD Modules instead of the MLCs.**

#### How will I benefit from micro-learning?

Since the MLCs are delivered via a mobile app, you can learn anytime, anywhere and with anyone within the same course. Each of the lessons are also short and presented in multiple modes of learning (quiz, reflection, activity-based tasks, discussion, etc.), thereby making them more easily digestible and engaging.
